

Dear Dr. Clegg

Dear Dr. Clegg

1961-10-11 + 09.00

square 11, 1961

After this 18th Oct 1961
I have not had time and space
to go over my notes and draw up
a detailed description of the
whole series.

I have now done so and I will
try to give you some idea of the
main features. The main point is
that the site was occupied by
a large number of individuals
of all ages and both sexes.
The site was surrounded by
a dense growth of trees and
scrub, which made it difficult
to get about. The site was
located in a small depression
between two ridges, one of which
was very steep and rocky.
