from all of which lands the party of the second part is now utilizing casinghead gas in the manufacture of casinghead gasoline at its plant on the Townsite of Wealaka, and

WHEREAS, Section 5 of the said regulations provides that the gasoline productivity of casinghead gas per thousand cubic feet shall be determined by a physical field test of the same, which contemplates a separate test on each leasehold of the gas taken therefrom, and it is desired that in lieu of a separate test on each leasehold, one test shall be made at the plant of the second party, of all of the gas from all of the lands above described, utilized by party of the second part.

NOW, THEREFORE, conditioned upon the approval of the Department of the Interior, it is stipulated and agreed that in lieu of a separate test of casinghead gas produced from the lands covered by the said agreement of March 21st, 1918, there shall be one test made at the plant of party of the second part, which said test shall be taken from the discharge side of the vacuum pump at said plant, and that the gasoline content as determined by the said test shall, for the purposes of said agreement, constitute the gasoline content of the gas taken from the lands described therein. The time, manner and method of making the said test, however, shall, in all other respects, be the same as is prescribed in the said agreement of March 21st, 1918, and nothing herein contained shall be construed to change, alter or modify said agreement, except in the particular above specified.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed and their corporate seals hereunto affixed, the day and year first above written.
